Chapter 5
Summary and Conclusion

Introduction

India is today one of the youngest nations in the world with more than 62% of the population in the working age group (15-59), and more than 54% of the total population below 25 years of age. In fact, in next 20 years, the labour force in the industrialised world is expected to decline by 4%, while in India it will increase by 32%.(from internet) However, current statistics shows that only 2% of the total employees in India have completed skills development training.

The Planning Commission of India has estimated that around 500 million skilled persons will be required by 2022, while the current capacity of the skill development program is 3.1 million. National Knowledge Commission (2009) reported about skilled based Education "Enlarge the coverage of skill spectrum to 1000 trades with relevance to our emerging needs. In National and State Level reports about Skill development also explain about the need of the training programme.

The effectiveness of the multimedia package was tested by conducting three days training programme. The trainees developed various skills among them. These various skills are measured by different tools. Analysis and interpretation of the data was presented in the chapter four. In this chapter the total summary of the project was presented.

The project director studied the various literature about skill development among leather workers and developed some research questions

5.1 Research Questions
1. How many of the leather workers have completed the education related to leather goods development?
2. How did they learn the skill of making leather goods?
3. Are they able to develop a newly design leather goods?
4. Is there any programme/ Course available in Maharashtra for development of leather goods?
