ROLE OF NGOs IN PROMOTION OF PEOPLE WITH DISABILITIES – A CASE STUDY: “HELPING OF THE HANDICAPPED”

Dr. Mahale Sanjivani Rajesh, Mrs. Oak Sharmishtha & Mr. Dhere Rahul

INTRODUCTION

According to Census 2011 the population of people with disability is near about 26,810,557 lacks in India. In Census 2011 information on eight types of disability has been collected. It was designed to cover most of the disabilities listed in the “Persons with Disabilities Act, 1995” and “The National Trust Act, 1999”.

Percentage of persons with disabilities in India has increased both in rural and urban areas during this decade. Decadal increase in proportion is significant in urban areas. The proportion of CWSN is always seems to be higher side in developing country than developed countries. What exactly disability means? Disability is a physical or mental impairment that interferes with the performance of activities expected of an individual of a certain age. It directly affects person's individual as well as social life. Many people with disabilities have demonstrated great skills in professional courses, but their employment percentage in comparison is still as dismal as 0.4 percent. There is an urgent need to assimilate them in the work force to enable them to live life with providing capacity building services.
